## Förordning (2018:1428) om myndigheters klimatanpassningsarbete

**SFS nr:** 2018:1428  
**Departement/myndighet:** Miljö- och energidepartementet  
**Utfärdad:** 2018-06-28  
**Ändringsregister:** SFSR (Regeringskansliet)  
**Källa:** Fulltext (Regeringskansliet)

**Innehåll:**

- Övergångsbestämmelser

*//Träder i kraft 1/2019-01-01/*

1 § Denna förordning gäller för Affärsverket svenska kraftnät. Boverket.

# Consequences in the food sector

- Patogens, disease vectors and invasive species
- Nitrate och hydrogen cyanide
- Nutrient contents
- Premises and temperature
- Increased competition for water
- Increased pressure on domestic production

Food security, food safety, healthy eating habits, sustainable food consumption

Climate change adaptation

Economic growth, employment, enterprise, innovation

Reduced inequality, Efficient and including institutions

## Food waste

- Reducing food waste is an important measure in climate adaptation
- Climate change will generate increased risk of food waste

Climate change adaptation is fundamental for addressing opportunities of changing climate

Measures for climate change adaptation must not counteract measures for reduction of environmental impact

**“I think today the most worrying problem I would put is climate change... Climate change is an all-encompassing threat. To our health, our source of food, our source of water and if we don’t do anything about it we are wasting our time with all so called development projects and the other creative things we are doing. It is extremely important that we pay attention to that.”**

(Kofi Annan, 7th
